*Article 3***Bilateral cumulation**

1. Notwithstanding Article 2(1)(b), materials originating in Morocco within the meaning of this Protocol shall be considered as materials originating in the Community and it shall not be necessary that such materials have undergone sufficient working or processing there, provided however that they have undergone working or processing going beyond that referred to in Article 8 of this Protocol.

2. Notwithstanding Article 2(2)(b), materials originating in the Community within the meaning of this Protocol shall be considered as materials originating in Morocco and it shall not be necessary that such materials have undergone working or processing there, provided however that they have undergone working or processing going beyond that referred to in Article 8 of this Protocol.

*Article 4***Cumulation with materials originating in Algeria and Tunisia**

1. Notwithstanding Article 2(1)(b) and subject to the provisions of paragraphs 3 and 4, materials originating in Algeria or Tunisia within the meaning of Protocol 2 annexed to the Agreements between the Community and these countries shall be considered as originating in the Community and it shall not be necessary that such materials have undergone sufficient working or processing, on condition however that they have undergone working or processing beyond that referred to in Article 8 of this Protocol.

2. Notwithstanding Article 2(2)(b) and subject to the provisions of paragraphs 3 and 4, materials originating in Algeria or Tunisia within the meaning of Protocol 2 annexed to the Agreements between the Community and these countries shall be considered as originating in Morocco and it shall not be necessary that such materials have undergone sufficient working or processing, on condition however that they have undergone working or processing beyond that referred to in Article 8 of this Protocol.

3. The provisions set out in paragraphs 1 and 2 concerning materials originating in Algeria are only applicable to the extent that trade between the Community and Algeria, and between Morocco and Algeria, is governed by identical rules of origin.

4. The provisions set out in paragraphs 1 and 2 concerning materials originating in Tunisia are only applicable to the extent that trade between the Community and Tunisia and between Morocco and Tunisia, is governed by identical rules of origin.

*Article 5***Cumulation of working or processing**

1. For the purpose of implementing Article 2(1)(b), working or processing carried out in Morocco, or, when the conditions

required by Article 4(3) and (4) are fulfilled, in Algeria or in Tunisia shall be considered as having been carried out in the Community when the products obtained undergo subsequent working or processing in the Community.

2. For the purpose of implementing Article 2(2)(b), working or processing carried out in the Community or, when the conditions required by Article 4(3) and (4) are fulfilled, in Algeria or in Tunisia shall be considered as having been carried out in Morocco when the products obtained undergo subsequent working or processing in Morocco.

3. Where pursuant to the provisions of paragraph 1 or 2 the originating products are obtained in two or more of the States referred to in those provisions or in the Community, they shall be considered as originating products of the State or the Community according to where the last working or processing took place, provided that that working or processing went beyond that referred to in Article 8.

*Article 6***Wholly obtained products**

1. Within the meaning of Article 2(1)(a) and (2)(a), the following shall be considered as 'wholly obtained' either in the Community or in Morocco:

- (a) mineral products extracted from their soil or from their seabed;
- (b) vegetable products harvested there;
- (c) live animals born and raised there;
- (d) products from live animals raised there;

(j) products extracted from marine soil or subsoil outside their territorial waters provided that they have sole rights to work that soil or subsoil;

(k) goods produced exclusively from products specified in subparagraphs (a) to (j).

2. The terms 'their vessels' and 'their factory ships' in paragraph 1(f) and (g) shall apply only to vessels and factory ships:

— which are registered or recorded in a Member State or in Morocco,

— which sail under the flag of a Member State or of Morocco,

— which are owned to the extent of at least 50% by nationals of Member States or of Morocco, or by a company with its head office in a Member State or in Morocco, of which the manager or managers, chairman of the board of directors or the supervisory board and the majority of the members of such boards are nationals of Member States or of Morocco and of which, in addition, in the case of partnerships or limited companies, at least half the capital belongs to Member States or Morocco, to public bodies or to nationals of the Member States or Morocco,

— of which the master and officers are nationals of Member States or of Morocco,

4. The terms 'Morocco' and the 'Community' shall also cover the territorial waters which surround Morocco and the Member States of the Community.

Vessels operating on the high seas, including factory ships on which the fish caught is worked or processed, shall be considered as part of the territory of the Community or of Morocco provided that they satisfy the conditions set out in paragraph 2.

Article 7

Sufficiently worked or processed products

1. For the purposes of Article 2, non-originating materials are considered to be sufficiently worked or processed when the product obtained is classified in a heading which is different

from that in which all the non-originating materials used in its manufacture are classified, subject to paragraph 2 and Article 8.

2. For a product mentioned in Columns 1 and 2 of the list in Annex 2, the conditions set out in Column 3 for the product concerned must be fulfilled instead of the rule set out in paragraph 1.

For the products falling under Chapters 84 to 91, as an alternative to satisfying the conditions set out in Column 3, the exporter may opt to apply the conditions set out in Column 4 instead.

Where in the list in Annex 2 a percentage rule is applied in determining the originating status of a product obtained in the Community or in Morocco the value added by the working or processing shall correspond to the ex-works price of the product obtained, less the value of third-country materials imported into the Community or Morocco.

3. These conditions indicate, for all products covered by the Agreement, the working or processing which must be carried out on the non-originating materials used in the manufacture of these products, and apply only in relation to such materials. Accordingly, it follows that if a product, which has acquired originating status by fulfilling the conditions set out in the list for that product, is used in the manufacture of another product, the conditions applicable to the product in which it is incorporated do not apply to it, and no account shall be taken of the non-originating materials which may have been used in its manufacture.

Article 8

Insufficient working or processing operations

For the purpose of implementing Article 7 the following shall be considered as insufficient working or processing to confer the status of originating products, whether or not there is a change of heading:

(a) operations to ensure the preservation of products in good condition during transport and storage (ventilation, spreading-out, drying, chilling, placing in brine, sulphur dioxide or other aqueous solutions, removal of damaged parts, and like operations);

(b) simple operations consisting of removal of dust, sifting or screening, sorting, classifying, matching (including the making-up of sets of articles), washing, painting, cutting-up;

(c) (i) changes of packaging and division and assembly of packages;

(ii) simple placing in bottles, flasks, bags, cases, boxes, fixing on cards or boards, etc., and all other simple packaging operations;

- (d) affixing marks, labels and other like distinguishing signs on products or their packaging;
- (e) simple mixing of products, whether or not of different kinds, where one or more components of the mixture do not meet the conditions laid down in this Protocol to enable them to be considered as originating in the Community or in Morocco;
- (f) simple assembly of parts to constitute a complete product;
- (g) a combination of two or more operations specified in subparagraphs (a) to (f);
- (h) slaughter of animals.

Article 9

Unit of qualification

1. The unit of qualification for the application of the provisions of this Protocol shall be the particular product which is considered as the basic unit when determining classification using the nomenclature of the Harmonised System.

Accordingly, it follows that:

- (a) when a product composed of a group or assembly of articles is classified under the terms of the Harmonised System under a single heading, the whole constitutes the unit of qualification;
- (b) when a consignment consists of a number of identical products classified under the same heading of the Harmonised System, each product must be taken individually when applying the provisions of this Protocol.

2. Where, under General Rule 5 of the Harmonised System, packaging is included with the product for classification purposes, it shall be considered to form a whole with the product for the purposes of determining origin.

Article 10

Accessories, spare parts and tools

Accessories, spare parts and tools dispatched with a piece of equipment, machine, apparatus or vehicle, which are part of the normal equipment and included in the price thereof or which are not separately invoiced, shall be regarded as forming a whole with the piece of equipment, machine, apparatus or vehicle in question.

Article 11

Sets

Sets, as defined in General Rule 3 of the Harmonised System, shall be regarded as originating when all component products are originating. Nevertheless, when a set is composed of originating and non-originating products, the set as a whole

shall be regarded as originating, provided that the value of the non-originating products does not exceed 15 % of the ex-works price of the set.

Article 12

Neutral elements

In order to determine whether a product originates in the Community or in Morocco it shall not be necessary to establish whether the electrical energy, fuel, plant and equipment as well as machines and tools used to obtain such product, or whether any goods, used in the course of production which do not enter and which were not intended to enter into the final composition of the product, are originating or not.

TITLE III

TERRITORIAL REQUIREMENTS

Article 13

Principle of territoriality

The conditions set out in Title II relative to the acquisition of originating status must be fulfilled without interruption in the Community or in Morocco without prejudice to the provisions of Articles 4 and 5.

Article 14

Reimportation of goods

If originating products exported from the Community or Morocco to another country are returned, except in so far as provided for in Article 4 or 5 they must be considered as non-originating, unless it can be demonstrated to the satisfaction of the customs authorities that:

- (a) the goods returned are the same goods as those exported; and
- (b) they have not undergone any operation beyond that necessary to preserve them in good condition while in that country or while being exported.

Article 15

Direct transport

1. The preferential treatment provided for under the Agreement applies only to products or materials which are transported between the territories of the Community and Morocco or, when the provisions of Articles 4 and 5 are applied, of Algeria or Tunisia without entering any other

territory. However, goods originating in Morocco or in the Community and constituting one single consignment which is not split up may be transported through territory other than that of the Community or Morocco or, when the provisions of Article 3 apply, of Algeria or Tunisia temporary warehousing in such territory, provided that the goods have remained under the surveillance of the customs authorities in the country of transit or of warehousing and that they have not undergone operations other than unloading, reloading or any operation designed to preserve them in good condition.

Products originating in Morocco or in the Community may be transported by pipeline across territory other than that of the Community or that of Morocco.

2. Evidence that the conditions set out in paragraph 1 have been fulfilled may be supplied to the customs authorities of the importing country by the production of:

- (a) a through bill of lading issued in the exporting country covering the passage through the country of transit; or
- (b) a certificate issued by the customs authorities of the country of transit:
 - (i) giving an exact description of the products;
 - (ii) stating the dates of unloading and reloading of the products and, where applicable, the names of the ships used; and
 - (iii) certifying the conditions under which the products remained in the transit country; or
- (c) failing these, any substantiating documents.

Article 16

Exhibitions

1. Products sent from one of the Contracting Parties for exhibition in a third country and sold after the exhibition for importation in another Contracting Party shall benefit on importation from the provisions of the Agreement on condition that the products meet the requirements of this Protocol entitling them to be recognised as originating in the Community or in Morocco and provided that it is shown to the satisfaction of the customs authorities that:

- (a) an exporter has consigned these products from one of the Contracting Parties to the country in which the exhibition is held and has exhibited them there;
- (b) the products have been sold or otherwise disposed of by that exporter to a person in another Contracting Party;

(c) the products have been consigned during the exhibition or immediately thereafter to the latter Contracting Party in the state in which they were sent for exhibition; and

(d) the products have not, since they were consigned for exhibition, been used for any purpose other than demonstration at the exhibition.

2. A proof of origin must be issued or made out in accordance with the provisions of Title IV and submitted to the customs authorities of the importing country in the normal manner. The name and address of the exhibition must be indicated thereon. Where necessary, additional documentary evidence of the nature of the products and the conditions under which they have been exhibited may be required.

3. Paragraph 1 shall apply to any trade, industrial, agricultural or crafts exhibition, fair or similar public show or display which is not organised for private purposes in shops or business premises with a view to the sale of foreign products and during which the products remain under customs control.

TITLE IV

PROOF OF ORIGIN

Article 17

EUR.1 movement certificate

Evidence of originating status of products, within the meaning of this Protocol, shall be given by an EUR.1 movement certificate, a specimen of which appears in Annex 3 to this Protocol.

Article 18

Normal procedure for the issue of an EUR.1 movement certificate

1. An EUR.1 movement certificate shall be issued by the customs authorities of the exporting country on application having been made in writing by the exporter or, under the exporter's responsibility, by his authorised representative.

2. For this purpose, the exporter or his authorised representative shall fill out both the EUR.1 movement certificate and the application form, specimens of which appear in Annex 3.

These forms shall be completed in one of the languages in which the Agreement is drawn up, in accordance with the provisions of the domestic law of the exporting country. If they are handwritten, they shall be completed in ink in printed characters. The description of the products must be given in the box reserved for this purpose without leaving any blank lines. Where the box is not completely filled a horizontal line must be drawn below the last line of the description, the empty space being crossed through.

3. The exporter applying for the issue of an EUR.1 movement certificate shall be prepared to submit at any time, at the request of the customs authorities of the exporting country where the EUR.1 movement certificate is issued, all appropriate documents proving the originating status of the products concerned as well as the fulfilment of the other requirements of this Protocol.

4. The EUR.1 movement certificate shall be issued by the customs authorities of a Member State of the European Community if the goods to be exported can be considered as products originating in the Community within the meaning of Article 2(1) of this Protocol. The EUR.1 movement certificate shall be issued by the customs authorities of Morocco; if the goods to be exported can be considered as products originating in Morocco within the meaning of Article 2(2) of this Protocol.

5. Where the cumulation provisions of Articles 2 to 5 are applied, the customs authorities of the Member States of the Community or of Morocco may issue EUR.1 movement certificates under the conditions laid down in this Protocol if the goods to be exported can be considered as products originating in the Community or in Morocco within the meaning of this Protocol and provided that the goods covered by the EUR.1 movement certificates are in the Community or in Morocco.

In these cases EUR.1 movement certificates shall be issued subject to the presentation of the proof of origin previously issued or made out. This proof of origin must be kept for at least three years by the customs authorities of the exporting State.

6. The issuing customs authorities shall take any steps necessary to verify the originating status of the products and the fulfilment of the other requirements of this Protocol. For this purpose, they shall have the right to call for any evidence and to carry out any inspection of the exporter's accounts or any other check which they consider appropriate.

The issuing customs authorities shall also ensure that the forms referred to in paragraph 2 are duly completed. In particular, they shall check whether the space reserved for the description of the products has been completed in such a manner as to exclude all possibility of fraudulent additions.

7. The date of issue of the EUR.1 movement certificate shall be indicated in the part of the certificate reserved for the customs authorities.

8. An EUR.1 movement certificate shall be issued by the customs authorities of the exporting country when the products to which it relates are exported. It shall be made available to the exporter as soon as actual exportation has been effected or ensured.

Article 19

EUR.1 movement certificates issued retrospectively

1. Notwithstanding Article 18(8), an EUR.1 movement certificate may exceptionally be issued after exportation of the products to which it relates if:

- (a) it was not issued at the time of exportation because of errors or involuntary omissions or special circumstances; or
- (b) it is demonstrated to the satisfaction of the customs authorities that an EUR.1 movement certificate was issued but was not accepted at importation for technical reasons.

2. For the implementation of paragraph 1, the exporter must indicate in this application the place and date of exportation of the products to which the EUR.1 movement certificate relates, and state the reasons for his request.

3. The customs authorities may issue an EUR.1 movement certificate retrospectively only after verifying that the information supplied in the exporter's application agrees with that in the corresponding file.

4. EUR.1 movement certificates issued retrospectively must be endorsed with one of the following phrases:

'NACHTRÄGLICH AUSGESTELLT', 'DÉLIVRÉ A POSTERIORI', 'RILASCIATO A POSTERIORI', 'AFGEGEVEN A POSTERIORI', 'ISSUED RETROSPECTIVELY', 'UDSTEDT EFTERFØLGENDE', 'ΕΚΔΟΘΕΝ ΕΚ ΤΩΝ ΥΣΤΕΡΩΝ', 'EXPEDIDO A POSTERIORI', 'EMITIDO A POSTERIORI', 'ANNETTU JÄLKIKÄTEEN', 'UTFÄRDAT I EFTERHAND', 'مسلمة في وقت لاحق'.

5. The endorsement referred to in paragraph 4 shall be inserted in the 'Remarks' box of the EUR.1 movement certificate.

Article 20

Issue of a duplicate EUR.1 movement certificate

1. In the event of theft, loss or destruction of an EUR.1 movement certificate, the exporter may apply to the customs authorities which issued it for a duplicate made out on the basis of the export documents in their possession.

2. The duplicate issued in this way must be endorsed with one of the following words:

'DUPLIKAT', 'DUPLICATA', 'DUPLICATO', 'DUPLICAAT', 'DUPLICATE', 'ΑΝΤΙΓΡΑΦΟ', 'DUPLICADO', 'SEGUNDA VIA', 'KAKSOISKAPPALE', 'نسخة'.

3. The endorsement referred to in paragraph 2, the date of issue and the serial number of the original certificate shall be inserted in the 'Remarks' box of the duplicate EUR.1 movement certificate.

4. The duplicate, which must bear the date of issue of the original EUR.1 movement certificate, shall take effect as from that date.

Article 21

Replacement of certificates

1. It shall at any time be possible to replace one or more EUR.1 movement certificates by one or more other certificates provided that this is done by the customs office responsible for controlling the goods.

2. The replacement certificate shall be regarded as a definite EUR.1 movement certificate for the purpose of the application of this Protocol, including the provisions of this Article.

3. The replacement certificate shall be issued on the basis of a written request from the re-exporter, after the authorities concerned have verified the information supplied in the applicant's request. The date and serial number of the original EUR.1 movement certificate shall be given in box 7.

Article 22

Simplified procedure for the issue of certificates

1. By way of derogation from Articles 18, 19 and 20 of this Protocol, a simplified procedure for the issue of EUR.1 movement certificates can be used in accordance with the following provisions.

2. The customs authorities in the exporting State may authorise any exporter, hereinafter referred to as 'approved exporter', making frequent shipments for which EUR.1 movement certificates may be issued and who offers, to the satisfaction of the competent authorities, all guarantees necessary to verify the originating status of the products, not to submit at the time of export to the customs office of the exporting State or territory either the goods or the application for an EUR.1 certificate relating to those goods, for the purpose of obtaining an EUR.1 certificate under the conditions laid down in Article 18 of this Protocol.

3. The authorisation referred to in paragraph 2 shall stipulate, at the choice of the competent authorities, that box 11 'Customs endorsement' of the EUR.1 movement certificate must:

(a) either be endorsed beforehand with the stamp of the competent customs office of the exporting State and the signature, which may be a facsimile, of an official of that office; or

(b) be endorsed by the approved exporter with a special stamp which has been approved by the customs authorities of the exporting State and corresponds to the specimen given in Annex 5 of this Protocol. Such stamp may be pre-printed on the forms.

4. In the cases referred to in paragraph 3(a), one of the following phrases shall be entered in box 7 'Remarks' of the EUR.1 movement certificate:

'PROCEDIMIENTO SIMPLIFICADO', 'FORENKLET PROCEDURE', 'VEREINFACHTES VERFAHREN', 'ΑΠΛΟΥΣΤΕΥΜΕΝΗ ΔΙΑΔΙΚΑΣΙΑ', 'SIMPLIFIED PROCEDURE', 'PROCÉDURE SIMPLIFIÉE', 'PROCEDURA SEMPLIFICATA', 'VEREENVOUDIGDE PROCEDURE', 'PROCEDIMENTO SIMPLIFICADO', 'YKSINKERTAISTETTU MENETTELY', 'FÖRENKLAD PROCEDUR', 'مبسطة مبسطة'.

5. Box 11 'Customs endorsement' of the EUR.1 certificate shall be completed if necessary by the approved exporter.

6. The approved exporter shall, if necessary, indicate in box 13 'Request for verification' of the EUR.1 certificate the name and address of the authority competent to verify such a certificate.

7. Where the simplified procedure is applied, the customs authorities of the exporting State may prescribe the use of EUR.1 certificates bearing a distinctive sign by which they may be identified.

8. In the authorisation referred to in paragraph 2 the competent authorities shall specify in particular:

(a) the conditions under which the applications for EUR.1 certificates are to be made;

(b) the conditions under which these applications are to be kept for at least three years;

(c) in the cases referred to in paragraph 3(b) the authority competent to carry out the subsequent verification referred to in Article 33 of this Protocol.

9. The customs authorities of the exporting State may declare certain categories of goods ineligible for the special treatment provided for in paragraph 2.

10. The customs authorities shall refuse the authorisation referred to in paragraph 2 to exporters who do not offer all the guarantees which they consider necessary. The competent authorities may withdraw the authorisation at any time. They must do so where the approved exporter no longer satisfies the conditions or no longer offers these guarantees.

11. The approved exporter may be required to inform the competent authorities, in accordance with the rules which they lay down, of the goods to be dispatched by him, so that such authorities may make any verification they think necessary before the departure of the goods.

12. The customs authorities of the exporting State may carry out any check on approved exporters which they consider necessary. Such exporters must allow this to be done.

13. The provisions of this Article shall be without prejudice to the application of the rules of the Community, the Member States and Morocco concerning customs formalities and the use of customs documents.

Article 23

Information certificate and declaration

1. When Articles 3, 4 and 5 are applied for the issue of an EUR.1 movement certificate the competent customs office in the State requested to issue the certificate for products in the manufacture of which products coming from Algeria, Tunisia or the Community are used, shall take into consideration the declaration, of which a specimen is given in Annex 6, given by the exporter in the State from which it came, either on the commercial invoice applicable to these products, or on a supporting document to that invoice.

2. The submission of the information certificate, issued under the conditions set out in paragraph 3 and of which a specimen is given in Annex 7, may however be requested of the exporter by the customs office concerned, either for checking the authenticity and accuracy of information given on the declaration provided for in paragraph 1, or for obtaining additional information.

3. The information certificate concerning the products taken into use shall be issued at the request of the exporter of these products, either in the circumstances envisaged in paragraph 2, or at the initiative of this exporter, by the competent customs office in the State from which these goods were exported. It shall be made out in duplicate. One copy shall be given to the exporter who has requested it, who shall send it either to the exporter of the final products or to the customs office where the issue of the EUR.1 movement certificate for these products has been requested. The second copy shall be preserved by the office which has issued it for at least three years.

Article 24

Validity of proof of origin

1. An EUR.1 movement certificate shall be valid for four months from the date of issue in the exporting country, and must be submitted within the said period to the customs authorities of the importing country.

2. EUR.1 movement certificates which are submitted to the customs authorities of the importing country after the final

date for presentation specified in paragraph 1 may be accepted for the purpose of applying preferential treatment, where the failure to submit these documents by the final date set is due to reasons of *force majeure* or exceptional circumstances.

3. In other cases of belated presentation, the customs authorities of the importing country may accept the EUR.1 movement certificates where the products have been submitted to them before the said final date.

Article 25

Submission of proof of origin

EUR.1 movement certificates shall be submitted to the customs authorities of the importing country in accordance with the procedures applicable in that country. The said authorities may require a translation of an EUR.1 movement certificate or an invoice declaration. They may also require the import declaration to be accompanied by a statement from the importer to the effect that the goods meet the conditions required for the implementation of the Agreement.

Article 26

Importation by instalments

Where, at the request of the importer and on the conditions laid down by the customs authorities of the importing country, dismantled or non-assembled products within the meaning of General Rule 2(a) of the Harmonised System falling within Chapters 84 and 85 of the Harmonised System are imported by instalments, a single proof of origin for such products shall be submitted to the customs authorities upon importation of the first instalment.

Article 27

Invoice declaration

1. Notwithstanding Article 17, the evidence of originating status, within the meaning of this Protocol, may be given by an invoice declaration, the text of which appears in Annex 4 to this Protocol, made by the exporter on an invoice, a delivery note or other commercial document (hereafter referred to as 'invoice declaration') describing the products concerned in sufficient detail as to permit the identification of consignments containing only originating products and whose value does not exceed ECU 5 110 per consignment.

2. The invoice declaration shall be completed and signed by the exporter or, under the exporters responsibility, by his authorised representative in accordance with this Protocol.

3. An invoice declaration shall be completed for each consignment.

4. The exporter who applied for the invoice declaration shall submit at the request of the customs authorities of the exporting State all supporting documents concerning the use of this form.

5. Articles 24 and 25 shall apply *mutatis mutandis* to the invoice declaration.

Article 28

Exemptions from formal proof of origin

1. Products sent as small packages from private persons to private persons or forming part of travellers' personal luggage shall be admitted as originating products without requiring the submission of a formal proof of origin, provided that such products are not imported by way of trade and have been declared as meeting the requirements of this Protocol and where there is no doubt as to the veracity of such a declaration. In the case of products sent by post, this declaration can be made on the customs declaration C2/CP3 or on a sheet of paper annexed to that document.

2. Imports which are occasional and consist solely of products for the personal use of the recipients or travellers or their families shall not be considered as imports by way of trade if it is evident from the nature and quantity of the products that no commercial purpose is in view.

3. Furthermore, the total value of these products must not exceed ECU 500 in the case of small packages or ECU 1 200 in the case of products forming part of travellers' personal luggage.

Article 29

Preservation of proof of origin and supporting documents

1. The exporter applying for the issue of an EUR.1 movement certificate shall keep for at least three years the documents referred to in Article 18(1) and (3).

2. The exporter making out an invoice declaration shall keep for at least three years a copy of this invoice declaration as well as the documents referred to in Article 27(1).

3. The customs authorities of the exporting country issuing an EUR.1 movement certificate shall keep for at least three years the application form referred to in Article 18(2).

4. The customs authorities of the importing country shall keep for at least three years the EUR.1 movement certificates submitted to them.

Article 30

Discrepancies and formal errors

1. The discovery of slight discrepancies between the statements made in an EUR.1 movement certificate, or in an invoice declaration and those made in the documents submitted to the customs office for the purpose of carrying out the formalities for importing the products shall not *ipso facto* render the EUR.1 movement certificate, or the invoice declaration null and void if it is duly established that this document does correspond to the products submitted.

2. Obvious formal errors such as typing errors on an EUR.1 movement certificate, or an invoice declaration should not cause this document to be rejected if these errors are not such as to create doubts concerning the correctness of the statements made in this document.

Article 31

Amounts expressed in ecu

1. Amounts in the national currency of the exporting country equivalent to the amounts expressed in ecu shall be fixed by the exporting country and communicated to the other Contracting Parties. When the amounts exceed the corresponding amounts fixed by the importing country, the latter shall accept them if the products are invoiced in the currency of the exporting country or in the currency of one of the other countries referred to in Article 4 of this Protocol.

If the goods are invoiced in the currency of another Member State of the Community the importing State shall recognise the amount notified by the country concerned.

2. Up to and including 30 April 2000, the amounts to be used in any given national currency shall be the equivalent in that national currency of the amounts expressed in ecu as at 1 October 1994.

For each successive period of five years, the amounts expressed in ecu and their equivalents in the national currencies of the States shall be reviewed by the Association Council on the basis of the exchange rates of the ecu on the first working day of October in the year immediately preceding that five-year period.

When carrying out this review, the Association Council shall ensure that there will be no decrease in the amounts to be used in any national currency and shall furthermore consider the desirability of preserving the effects of the limits concerned in real terms. For this purpose, it may decide to modify the amounts expressed in ecu.

TITLE V

ARRANGEMENTS FOR ADMINISTRATIVE COOPERATION*Article 32***Communication of stamps and addresses**

The customs authorities of the Member States and of Morocco shall provide each other, through the Commission of the European Communities, with specimen impressions of stamps used in their customs offices for the issue of EUR.1 certificates and with the addresses of the customs authorities responsible for issuing EUR.1 movement certificates and for verifying those certificates and invoice declarations.

*Article 33***Verification of EUR.1 movement certificates, invoice declarations and information certificates**

1. Subsequent verification of EUR.1 movement certificates and invoice declarations shall be carried out randomly or whenever the customs authorities of the importing State have reason to doubt the authenticity of such documents, the originating status of the products concerned or the fulfilment of the other requirements of this Protocol.

2. For the purposes of implementing the provisions of paragraph 1, the customs authorities of the importing country shall return the EUR.1 movement certificate, the invoice declaration, or a copy of these documents, to the customs authorities of the exporting country giving, where appropriate, the reasons of substance or form for an inquiry.

In order to assist the verification, the customs authorities shall provide all the necessary documents and any information collected which indicate that the information on the EUR.1 certificate or the invoice declaration is incorrect.

3. The verification shall be carried out by the customs authorities of the exporting country. For this purpose, they shall have the right to call for any evidence and to carry out any inspection of the exporter's accounts or any other check which they consider appropriate.

4. If the customs authorities of the importing country decide to suspend the granting of preferential treatment to the products concerned while awaiting the results of the verification, they shall offer to release the products to the importer subject to any precautionary measures judged necessary.

5. The customs authorities requesting the verification shall be informed of the results of this verification within a maximum of 10 months. These results must indicate clearly whether the documents are authentic and whether the products concerned can be considered as originating products and fulfil the other requirements of this Protocol.

6. If in cases of reasonable doubt there is no reply within 10 months or if the reply does not contain sufficient information to determine the authenticity of the document in question or the real origin of the products, the requesting customs authorities shall, except in exceptional circumstances, refuse entitlement to the preferences.

7. The subsequent verification of information certificates provided for by Article 23 shall be carried out in the cases mentioned in paragraph 1 and in accordance with the procedures laid down in paragraphs 2 to 6.

*Article 34***Dispute settlement**

Where disputes arise in relation to the verification procedures of Article 33 which cannot be settled between the customs authorities requesting a verification and the customs authorities responsible for carrying out this verification or where they raise a question as to the interpretation of this Protocol, they shall be submitted to the Customs Cooperation Committee.

In all cases the settlement of disputes between the importer and the customs authorities of the importing State shall be under the legislation of the said State.

*Article 35***Penalties**

Penalties shall be imposed on any person who draws up, or causes to be drawn up, a document which contains incorrect information for the purpose of obtaining a preferential treatment for products.

*Article 36***Free zones**

1. The Member States and Morocco shall take all necessary steps to ensure that products traded under cover of an EUR.1 movement certificate, which in the course of transport use a free zone situated in their territory, are not substituted by other goods and that they do not undergo handling other than normal operations designed to prevent their deterioration.

2. By means of an exemption to the provisions contained in paragraph 1, when products originating in the Community or in Morocco and imported into a free zone under cover of an

EUR.1 certificate undergo treatment or processing, the authorities concerned must issue a new EUR.1 certificate at the exporter's request, if the treatment or processing undergone is in conformity with the provisions of this Protocol.

(1) products originating in Ceuta and Melilla:

- (a) products wholly obtained in Ceuta and Melilla;
- (b) products obtained in Ceuta and Melilla in the manufacture of which products other than those referred to in (a) are used, provided that:
 - (i) the said products have undergone sufficient working or processing within the meaning of Article 7 of this Protocol;
 - or that
 - (ii) those products originate in Morocco or the Community within the meaning of this Protocol, or, when the conditions required in Article 4(3) and (4) are fulfilled, from Algeria or from Tunisia, provided that they have been submitted to working

3. Ceuta and Melilla shall be considered as a single territory.

4. The exporter or his authorised representative shall enter 'Morocco' and 'Ceuta and Melilla' in box 2 of EUR.1 movement certificates. In addition, in the case of products originating in Ceuta and Melilla, this shall be indicated in box 4 of EUR.1 movement certificates.

Article 42

Implementation of the Protocol

The Community and Morocco shall each take the steps necessary to implement this Protocol.

ANNEX I

INTRODUCTORY NOTES

FOREWORD

These notes shall apply, where appropriate, to all manufactured products using non-originating materials, even if they are not subject to specific conditions contained in the list in Annex II but are subject instead to the change of heading rule set out in Article 7(1).

Note 1

- 1.1. The first two columns in the list describe the product obtained. The first column gives the heading number, or the chapter number, used in the Harmonised System and the second column gives the description of goods used in that system for that heading or chapter. For each entry in the first two columns a rule is specified in Columns 3 or 4. Where, in some cases, the entry in the first column is preceded by an 'ex', this signifies that the rule in Columns 3 or 4 only applies to the part of that heading or chapter as described in Column 2.
- 1.2. Where several heading numbers are grouped together in Column 1 or a chapter number is given and the description of product in Column 2 is therefore given in general terms, the adjacent rule in Columns 3 or 4 applies to all products which, under the Harmonised System, are classified within headings of the chapter or within any of the headings grouped together in Column 1.

Note 2

- 2.1. In the case of any heading not in the list or any part of a heading that is not in the list, the 'change of heading' rule set out in Article 7(1) applies. If a 'change of heading' condition applies to any entry in the list, then it is contained in the rule in Column 3.
- 2.2. The working or processing required by a rule in Column 3 has to be carried out only in relation to the non-originating materials used. The restrictions contained in a rule in Column 3 likewise apply only to the non-originating materials used.
- 2.3. Where a rule states that 'materials of any heading' may be used, materials of the same heading as the product may also be used, subject, however, to any specific limitations which may also be contained in the rule. However, the expression 'manufacture from materials of any heading, including other materials of heading No ...' means that only materials classified in the same heading as the product of a different description than that of the product as given in Column 2 of the list may be used.
- 2.4. If a product made from non-originating materials which has acquired originating status during manufacture by virtue of the change of heading rule or its own list rule is used as a material in the process of manufacture of another product, then the rule applicable to the product in which it is incorporated does not apply to it.

For example:

An engine of heading No 8407, for which the rule states that the value of the non-originating materials which may be incorporated may not exceed 40% of the ex-works price, is made from 'other alloy steel roughly shaped by forging' of heading No 7224.

If this forging has been forged in the country concerned from a non-originating ingot then the forging has already acquired origin by virtue of the rule for heading No ex 7224 in the list. It can then count as originating in the value calculation for the engine regardless of whether it was produced in the same factory or another. The value of the non-originating ingot is thus not taken into account when adding up the value of the non-originating materials used.

- 2.5. Even if the change of heading rule or the other rules contained in the list are satisfied, a product shall not acquire originating status if the processing carried out, taken as a whole, is insufficient within the meaning of Article 6.

Note 3

- 3.1. The rule in the list represents the minimum amount of working or processing required and the carrying-out of more working or processing also confers originating status; conversely, the carrying-out of less working or processing cannot confer origin. Thus if a rule says that non-originating material at a certain level of manufacture may be used, the use of such material at an earlier stage of manufacture is allowed and the use of such material at a later stage is not.
- 3.2. When a rule in the list specifies that a product may be manufactured from more than one material, this means that any one or more materials may be used. It does not require that all be used.

For example:

The rule for fabrics say that natural fibres may be used and that chemical materials, among other materials, may also be used. This does not mean that both have to be used; one can use one or the other or both.

If, however, a restriction applies to one material and other restrictions apply to other materials in the same rule, then the restrictions only apply to the materials actually used.

For example:

The rule for sewing machines specifies that both the thread tension mechanism used and the zigzag mechanism used must originate; these two restrictions only apply if the mechanisms concerned are actually incorporated into the sewing machine.

- 3.3. When a rule in the list specifies that a product must be manufactured from a particular material, the condition obviously does not prevent the use of other materials which, because of their inherent nature, cannot satisfy the rule.

For example:

The rule for heading No 1904 which specifically excludes the use of cereals or their derivatives does not prevent the use of mineral salts, chemicals and other additives which are not produced from cereals.

For example:

In the case of an article made from non-woven materials, if the use of only non-originating yarn is allowed for this class of article, it is not possible to start from non-woven cloth even if non-woven cloths cannot normally be made from yarn. In such cases, the starting material would normally be at the stage before yarn that is the fibre stage.

See also Note 6.3 in relation to textiles.

- 3.4. If in a rule in the list two or more percentages are given for the maximum value of non-originating materials that can be used, then these percentages may not be added together. The maximum value of all the non-originating materials used may never exceed the highest of the percentages given. Furthermore, the individual percentages must not be exceeded in relation to the particular materials they apply to.

Note 4

- 4.1. The term 'natural fibres' is used in the list to refer to fibres other than artificial or synthetic fibres and is restricted to the stages before spinning takes place, including waste, and, unless otherwise specified, the term 'natural fibres' includes fibres that have been carded, combed or otherwise processed but not spun.
- 4.2. The term 'natural fibres' includes horsehair of heading No 0503, silk of heading Nos 5002 and 5003 as well as the wool fibres, fine or coarse animal hair of heading Nos 5101 to 5105, the cotton fibres of heading Nos 5201 to 5203 and the other vegetable fibres of heading Nos 5301 to 5305.
- 4.3. The terms 'textile pulp', 'chemical materials' and 'paper-making materials' are used in the list to describe the materials not classified in Chapters 50 to 63, which can be used to manufacture artificial, synthetic or paper fibres or yarns.

- 4.4. The term 'man-made staple fibres' is used in the list to refer to synthetic or artificial filament tow, staple fibres or waste, of headings Nos 5501 to 5507.

Note 5

- 5.1. In the case of the products classified within those headings in the list to which a reference is made to this note, the conditions set out in Column 3 of the list shall not be applied to any basic textile materials used in their manufacture which, taken together, represent 10% or less of the total weight of all the basic textile materials used (but see also Notes 5.3 and 5.4 below).
- 5.2. However, this tolerance may only be applied to mixed products which have been made from two or more basic textile materials.

The following are the basic textile materials:

- silk,
- wool,
- coarse animal hair,
- fine animal hair,
- horsehair,
- cotton,
- paper-making materials and paper,
- flax,
- true hemp,
- jute and other textile bast fibres,
- sisal and other textile fibres of the genus *Agave*,
- coconut, abaca, ramie and other vegetable textile fibres,
- synthetic man-made filaments,
- artificial man-made filaments,
- synthetic man-made staple fibres,
- artificial man-made staple fibres.

For example:

A yarn of heading No 5205 made from cotton fibres of heading No 5203 and synthetic staple fibres of heading No 5506 is a mixed yarn. Therefore, non-originating synthetic staple fibres that do not satisfy the origin rules (which require manufacture from chemical materials or textile pulp) may be used up to a weight of 10% of the yarn.

For example:

A woollen fabric of heading No 5112 made from woollen yarn of heading No 5107 and synthetic yarn of staple fibres of heading No 5509 is a mixed fabric. Therefore synthetic yarn which does not satisfy the origin rules (which require manufacture from chemical materials or textile pulp) or woollen yarn that does not satisfy the origin rules (which require manufacture from natural fibres, not carded or combed or otherwise prepared for spinning) or a combination of the two may be used up to a weight of 10% of the fabric.

For example:

Tufted textile fabric of heading No 5802 made from cotton yarn of heading No 5205 and cotton fabric of heading No 5210 is only a mixed product if the cotton fabric is itself a mixed fabric being made from yarns classified in two separate headings or if the cotton yarns used are themselves mixtures.

For example:

If the tufted textile fabric concerned had been made from cotton yarn of heading No 5205 and synthetic fabric of heading No 5407, then, obviously, the yarns used are two separate basic textile materials and the tufted textile fabric is accordingly a mixed product.

For example:

A carpet with tufts made from both artificial yarns and cotton yarns and with a jute backing is a mixed product because three basic textile materials are used. Thus, any non-originating materials that are at a later stage of manufacture than the rule allows may be used, provided their total weight taken together does not exceed 10 % of the weight of the textile materials in the carpet. Thus, both the jute backing and/or the artificial yarns could be imported at that stage of manufacture, provided the weight conditions are met.

- 5.3. In the case of fabrics incorporating 'yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped' this tolerance is 20 % in respect of this yarn.
- 5.4. In the case of fabrics incorporating strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of an adhesive between two films of plastic film, this tolerance is 30 % in respect of this strip.

Note 6

- 6.1. In the case of those textile products which are marked in the list by a footnote referring to this note, textile materials with the exception of linings and interlinings which do not satisfy the rule set out in the list in Column 3 for the made-up products concerned may be used provided that they are classified in a heading other than that of the product and that their value does not exceed 8 % of the ex-works price of the product.
- 6.2. Materials which are not classified within Chapters 50 to 63 may be used freely, whether or not they contain textiles.

For example:

If a rule in the list provides that for a particular textile item, such as trousers, yarn must be used, this does not prevent the use of metal items, such as buttons, because buttons are not classified within Chapters 50 to 63. For the same reason, it does not prevent the use of slide-fasteners even though slide-fasteners normally contain textiles.

- 6.3. Where a percentage rule applies, the value of trimmings and accessories must be taken into account when calculating the value of the non-originating materials incorporated.

Note 7

- 7.1. For the purposes of heading Nos ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, the 'specific processes' are the following:
- (a) vacuum distillation;
 - (b) redistillation by a very thorough fractionation process⁽¹⁾;
 - (c) cracking;
 - (d) reforming;
 - (e) extraction by means of selective solvents;
 - (f) the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolourisation and purification with naturally active earth, activated earth, activated charcoal or bauxite;
 - (g) polymerisation;
 - (h) alkylation;
 - (i) isomerisation.
- 7.2. For the purposes of heading Nos 2710, 2711 and 2712, the 'specific processes' are the following:
- (a) vacuum distillation;
 - (b) redistillation by a very thorough fractionation process;
 - (c) cracking;
 - (d) reforming;

⁽¹⁾ See Additional Explanatory Note 4(b) to Chapter 27 of the Combined Nomenclature.

- (e) extraction by means of selective solvents;
 - (f) the process comprising all the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolorisation and purification with naturally active earth, activated earth, activated charcoal or bauxite;
 - (g) polymerisation;
 - (h) alkylation;
 - (ij) isomerisation;
 - (k) (in respect of heavy oils falling within heading No ex 2710 only) desulphurisation with hydrogen resulting in a reduction of at least 85 % of the sulphur content of the products processed (ASTM D 1266-59 T method);
 - (l) (in respect of products falling within heading No 2710 only) deparaffining by a process other than filtering;
 - (m) (in respect of heavy oils falling within heading No ex 2710 only) treatment with hydrogen at a pressure of more than 20 bar and a temperature of more than 250 °C with the use of a catalyst, other than to effect desulphurisation, when the hydrogen constitutes an active element in a chemical reaction. The further treatment with hydrogen of lubricating oils of heading No ex 2710 (e.g. hydrofinishing or decolorisation) in order, more especially, to improve colour or stability shall not, however, be deemed to be a specific process;
 - (n) (in respect of fuel oils falling within heading No ex 2710 only) atmospheric distillation, on condition that less than 30 % of these products distils, by volume, including losses, at 300 °C by the ASTM D 86 method;
 - (o) (in respect of heavy oils other than gas oils and fuel oils falling within heading No ex 2710 only) treatment by means of a high-frequency electrical brush-discharge.
- 7.3. For the purposes of heading Nos ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, simple operations such as cleaning, decanting, desalting, water separation, filtering, colouring, marketing obtaining a sulphur content as a result of mixing products with different sulphur contents, any combination of these operations or like operations do not confer origin.
