

APPENDIX 6.F.4 TO ANNEX 6.F

NORWAY – SCHEDULE OF SPECIFIC COMMITMENTS

Explanatory note to Norway's schedule of specific commitments

Unless otherwise indicated, the classification of services sectors is based on the 1991 Provisional Central Product Classification of the United Nations Statistical Office and the ordering reflects the services sectoral classification list used in the GATT document MTN.GNS/W/120, dated 10 July 1991.

Measures relating to qualification requirements and procedures, technical standards, authorisation requirements and licencing requirements and procedures continue to apply where they do not constitute a limitation in respect of Articles XVI (Market Access) and XVII (National treatment) of the GATS. Norway maintains language requirements in certain sectors. These requirements are deemed to be necessary and proportionate in order to ensure the quality of the services and therefore not inscribed as a national treatment restriction.

Modes of supply: 1) Cross-border supply 2) Consumption abroad 3) Commercial presence 4) Presence of natural persons

UNDERSTANDING ON THE SCOPE OF COVERAGE OF CPC 84 - COMPUTER AND RELATED SERVICES

1. CPC 84 covers all computer and related services.
2. Technological developments have led to the increased offering of these services as a bundle or package of related services that can include some or all of the basic functions listed in paragraph 3. For example, services such as web or domain hosting, data mining services and grid computing each consist of a combination of basic computer services functions.
3. Computer and related services, regardless of whether they are delivered via a network, including the Internet, include all services that provide any of the following or any combination thereof:
 - consulting, adaptation, strategy, analysis, planning, specification, design, development, installation, implementation, integration, testing, debugging, updating, support, technical assistance, or management of or for computers or computer systems;
 - consulting, strategy, analysis, planning, specification, design, development, installation, implementation, integration, testing, debugging, updating, adaptation, maintenance, support, technical assistance, management or use of or for software⁶;
 - data processing, data storage, data hosting or database services;
 - maintenance and repair services for office machinery and equipment, including computers and
 - training services for staff of clients, related to software, computers or computer systems, and not elsewhere classified.
4. In many cases, computer and related services enable the provision of other services⁷ by both electronic and other means. However, in such cases, there is an important distinction between the computer and related service (*e.g.*, web-hosting or application hosting) and the other service² enabled by the computer and related service. The other service, regardless of whether it is enabled by a computer and related service, is not covered by CPC 84.

⁶ The term “software” may be defined as the sets of instructions required to make computers work and communicate. A number of different programmes may be developed for specific applications (application software), and the customer may have a choice of using ready-made programmes off the shelf (packaged software), developing specific programmes for particular requirements (customized software) or using a combination of the two.

⁷ *E.g.*, W/120.1.A.b. (accounting, auditing and bookkeeping services), W/120.1.A.d. (architectural services), W/120.1.A.h. (medical and dental services), W/120.2.D (audiovisual services), W/120.5. (educational services).

ATTACHMENT II

NOTES TO MARITIME TRANSPORT

1. "Reasonable and non-discriminatory terms and conditions" means, for the purpose of multimodal transport operations, the ability of the multimodal transport operator to arrange for the conveyance of its merchandise on a timely basis, including priority over other merchandise which has entered the port at a later date. A "multimodal transport operator" means the person on whose behalf the bill of lading/multimodal transport document, or any other document evidencing a contract of multimodal carriage of goods, is issued and who is responsible for the carriage of goods pursuant to the contract of carriage.

2. "Domestic transport" is defined as maritime transport of goods and passengers between ports in Norway, including locations on the continental shelf where petroleum is explored or produced.

3. "Other forms of commercial presence for the supply of international maritime transport services" means the ability for international maritime transport service suppliers of the other members to undertake locally all activities which are necessary for the supply to their customers of a partially or fully integrated transport service, within which the maritime transport constitutes a substantial element. (This commitment shall however not be construed as limiting in any manner the commitments undertaken under the cross-border mode of delivery).

These activities include, but are not limited to:

- (a) marketing and sales of maritime transport and related services through direct contact with customers, from quotation to invoicing, these services being those operated or offered by the service supplier itself or by service suppliers with which the service seller has established standing business arrangements;
- (b) the acquisition, on their own account or on behalf of their customers (and the resale to their customers) of any transport and related services, including inward transport services by any mode, particularly inland waterways, road and rail, necessary for the supply of the integrated service;
- (c) the preparation of documentation concerning transport documents, customs documents, or other documents related to the origin and character of the goods transported;
- (d) the provision of business information by any means, including computerized information systems and electronic data interchange (subject to the provisions of the Annex on telecommunications);
- (e) the setting of any business arrangements (including participation in the stock of a company) and the appointment of personnel

recruited locally (or, in the case of foreign personnel, subject to the horizontal commitment on movement of personnel) with any locally established shipping agency;

- (f) acting on behalf of the companies, organizing the call of the ship or taking over cargoes when required.

4. "Maritime cargo handling services" means activities exercised by stevedore companies, including terminal operators, but not including the direct activities of dockers, when this workforce is organized independently of the stevedoring or terminal operator companies. The activities covered include the organization and supervision of:

- the loading/discharging of cargo to/from a ship;
- the lashing/unlashing of cargo;
- the reception/delivery and safekeeping of cargoes before shipment or after discharge.

5. "Customs clearance services" (alternatively "customs house brokers' services") means activities consisting in carrying out on behalf of another party customs formalities concerning import, export or through transport of cargoes, whether this service is the main activity of the service provider or a usual complement of its main activity.

6. "Container station and depot services" means activities consisting in storing containers, whether in a port area or inland, with a view to their stuffing/stripping, repairing, and making them available for shipments.

7. "Maritime agency services" means the activities consisting in representing, within a given geographic area, as an agent the business interests of one or more shipping lines or shipping companies, for the following purposes:

- marketing and sales of maritime transport and related services, from quotation to invoicing, and issuance of bills of lading on behalf of the companies; acquisition and resale of the necessary related services, preparation of documentation, and provision of business information;
- acting on behalf of the companies organizing the call of the ship or taking over cargoes when required.

8. "Freight forwarding services" means the activity consisting of organizing and monitoring shipment operations on behalf of shippers, through the acquisition of transport and related services, preparation of documentation and provision of business information.

9.
