

CHAPTER 3

RULES OF ORIGIN AND ORIGIN PROCEDURES

Section A Definitions and General Provisions

Article 3.1 Definitions

For the purposes of this Chapter:

“exporter” means a person who exports an originating good;

“Generally Accepted Accounting Principles” means those principles recognised by consensus or with substantial authoritative support in the territory of a Party with respect to the recording of revenues, expenses, costs, assets, and liabilities; the disclosure of information; and the preparation of financial statements. These principles may encompass broad guidelines for general application, as well as detailed standards, practices, and procedures;

“good” means any merchandise, product, article, or material;

“material” means a good used in the production of another good, including a part or ingredient;

“non-originating good” or **“non-originating material”** means a good or material that does not qualify as originating in accordance with this Chapter;

If there is no price paid or payable, or if the price paid or payable does not include the value of all materials, the value of the good:

- (a) must include the value of all materials and the cost of production employed in producing the good, calculated in accordance with accounting principles which are generally accepted in the Party of the producer, and may also include amounts for general expenses and profit to the producer that can be reasonably allocated to the good; or
- (b) must be determined in accordance with the Customs Valuation Agreement.

Any internal taxes which are, or may be, repaid when the good obtained is exported are excluded. If the value of the good includes costs incurred subsequent to the good leaving the place of production, such as freight, insurance, packing, and all other costs incurred to transport the good, those costs are to be excluded.

Article 3.2 Origin Criteria

Article 3.4

Regional Value Content

Where Annex 3A (Product Specific Rules of Origin) specifies a regional value content test to determine whether a good is originating, each Party shall provide that the regional value content shall be calculated using one of the following methods:

Build-Down Method: based on the value of non-originating materials

$$RVC = \frac{\text{value of the good} - VNM}{\text{value of the good}} \times 100$$

Build-Up Method: based on the value of originating materials

$$RVC = \frac{VOM}{\text{value of the good}} \times 100$$

in each case where:

“**RVC**” is the regional value content of a good, expressed as a percentage;

“**VOM**” is the value of originating materials used in the production of the good in the territory of one or both of the Parties, as determined in accordance with Articles 3.5 (Materials Used in Production) to Article 3.7 (Further Adjustments to the Value of Materials); and

“**VNM**” is the value of non-originating materials including materials of undetermined origin, used in the production of the good in the territory of one or both of the Parties, as determined in accordance with Articles 3.5 (Materials Used in Production) to Article 3.7 (Further Adjustments to the Value of Materials).

Article 3.5

Materials Used in Production

1. Each Party shall provide that if a non-originating material undergoes further production such that it satisfies the requirements of this Chapter, the material is treated as originating when determining the originating status of the subsequently produced good, regardless of whether that material was produced by the producer of the good.
2. Each Party shall provide that if non-originating material is used in the production of a good, the following may be counted as originating content for the purposes of determining whether the resulting good meets a regional value content requirement:
 - (a) the value of processing of the non-originating material undertaken in

the territory of one or both of the Parties by one or more producers;
and

- (b) the value of any originating material used in the production of the non-originating material undertaken in the territory of one or both of the Parties by one or more producers.

Article 3.6 **Value of Materials Used in Production**

For the purposes of this Chapter, the value of a material is:

- (a) for a material imported by the producer of the good, the price actually paid or payable for the material at the time of import or other value determined in accordance with the Customs Valuation Agreement, including the costs incurred in the international shipment of the good;
- (b) for a material acquired in the territory where the good is produced:
 - (i) the price paid or payable by the producer in the Party where the producer is located;
 - (ii) the value as determined for an imported material in subparagraph (a); or
 - (iii) the earliest ascertainable price paid or payable in the territory of the Party; and
- (c) for a material that is self-produced:
 - (i) all the costs incurred in the production of the material, which includes general expenses; and
 - (ii) an amount equivalent to the profit added in the normal course of trade, or equal to the profit that is usually reflected in the sale of goods of the same class or kind as the self-produced material that is being valued.

Article 3.7 **Further Adjustments to the Value of Materials**

1. Each Party shall provide that for an originating material, the following expenses may be added to the value of the material, if not included under Article 3.6 (Value of Materials Used in Production):

- (a) the costs of freight, insurance, packing, and all other costs incurred to transport the material to the location of the producer of the good;
 - (b) duties, taxes, and customs brokerage fees on the material, paid in the territory of a Party, other than duties and taxes that are waived, refunded, refundable, or otherwise recoverable, which include credit against duty or tax paid or payable; and
 - (c) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of reusable scrap or by-product.
- 2. Each Party shall provide that, for a non-originating material or material of undetermined origin, the following expenses may be deducted from the value of the material:
 - (a) the costs of freight, insurance, packing, and all other costs incurred in transporting the material to the location of the producer of the good;
 - (b) duties, taxes, and customs brokerage fees on the material paid in the territory of one or both Parties, other than duties and taxes that are waived, refunded, refundable, or otherwise recoverable, which include credit against duty or tax paid or payable; and
 - (c) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of reusable scrap or by-product.
- 3. For the purposes of this Article, if a cost, expense, or value is unknown or documentary evidence of the amount of the adjustment is not available, then no adjustment is allowed for that particular cost, expense, or value.

Article 3.8

Cumulation

- 1. Each Party shall provide that a good is originating if the good is produced in the territory of one or both of the Parties by one or more producers, provided that the good satisfies the requirements of Article 3.2 (Origin Criteria) and all other applicable requirements in this Chapter.
- 2. Each Party shall provide that an originating good or material of one Party is considered originating in the territory of the other Party when used as a material in the production of a good in the territory of the other Party.
- 3. Each Party shall provide that production undertaken on a non-originating material in the territory of one or both Parties by one or more producers may contribute toward the originating content of a good for the purpose of

determining its origin, regardless of whether that production was sufficient to confer originating status to the material itself.

4. If each Party has a free trade agreement with the same non-party, the Rules of Origin and Customs and Trade Facilitation Working Group shall meet to consider possible amendments and modifications to this Chapter, including any conditions, for the purpose of applying cumulation with that non-party.
5. Subject to paragraph 6, the cumulation provided for in paragraph 2 may be applied to an originating good or material of an eligible developing country and the cumulation provided for in paragraph 3 may be applied to production undertaken on a non-originating material in the territory of an eligible developing country.
6. Paragraph 5 shall be of no effect until the Parties, through the Rules of Origin and Customs and Trade Facilitation Working Group, determine the list of countries and territories to be considered eligible developing countries for the purposes of this Article as well as the list of goods and materials to which paragraph 5 applies, together with any applicable conditions. The Parties may, through the Working Group, update the list of eligible developing countries, goods, materials, and applicable conditions, from time to time.

Article 3.9 Tolerance

Each Party shall provide that a good containing non-originating materials that do not satisfy the applicable change in tariff classification requirement specified in Annex 3A (Product Specific Rules of Origin) for the good, the good is nonetheless an originating good if:

- (a) the value of those non-originating materials does not exceed 15 per cent of the value of the good;
- (b) in the case of goods classified under Chapters 1 to 24 and 50 to 63 of the Harmonized System, the total weight of all those materials does not exceed 15 per cent of the net weight of the good, net weight meaning the weight of the material or good not including the weight of any packaging; or

Article 3.21
Delayed Claims for Preferential Treatment

1. Each Party shall provide that an importer may apply for preferential tariff treatment, and a refund of any excess duties paid for a good, if the importer did not make a claim for preferential tariff treatment at the time of importation, provided that the good would have qualified for preferential tariff treatment when it was imported into the territory of the Party.

 - (b) if the claim is based on an origin declaration, an importer that becomes aware or has reason to believe that an origin declaration for a good which it has imported, and to which preferential treatment has been granted, contains incorrect information shall immediately notify the customs authority of the importing Party in writing of any change affecting the originating status of that good and pay any duties owing; and
 - (c) if the claim is based on the importer's knowledge, an importer that becomes aware or has reason to believe that the importer's knowledge

and supporting documentation for a good which it has imported, and to which preferential treatment has been granted, contains incorrect information shall immediately notify the customs authority of the importing Party in writing of any change affecting the originating status of that good and pay any duties owing.

2. Each Party shall encourage its customs authority, when considering imposing a penalty in relation to an incorrect origin declaration, to consider as a significant mitigating factor a voluntary notification given in accordance with paragraph 1, provided in the case of a notification given by an importer, the importer corrects the error and repays any duties owing.

Article 3.23 **Minor Errors and Discrepancies**

1. A Party shall not reject an origin declaration due to minor discrepancies or errors, such as slight discrepancies between documents, omissions of information, or typing errors, provided these minor discrepancies or errors do not create doubt as to the originating status of the good.
2. Each Party shall provide that, if its customs authority determines that an origin declaration in respect of a good imported into its territory is illegible or defective on its face, the importer shall be granted a period of no less than 30 days after the date the customs authority of the importing Party advises the importer that the declaration is illegible or defective to provide the customs authority of the importing Party with a copy of corrected origin declaration.

Article 3.24 **Penalties**

Each Party shall adopt or maintain measures imposing criminal, civil, or administrative penalties for violations of its laws and regulations relating to this Chapter.

Article 3.25 **Record Keeping Requirements**

2. Each Party shall provide that an importer claiming preferential tariff treatment for a good imported into the territory of that Party shall maintain:
 - (a) the documentation related to the importation, including the origin declaration if that served as the basis for the claim; and

 - (b) denies access to those records or documentation.

Article 3.26 **Verification of Origin**

Initiating a verification process

1. The customs authority of the importing Party may conduct a verification process to determine whether a good imported into its territory is originating, or whether other requirements provided in this Chapter have been met.
2. A verification process may commence at the time the customs import declaration is lodged, before the release of the goods by the importing customs authority, or after the release of the goods. The verification processes shall be undertaken based on risk assessment procedures, including random selection of imports.
3. The customs authority of the importing Party may undertake a verification process by means of a written request for:
 - (a) information from the importer of the good;

- (b) information from the producer or exporter of the good where the information obtained under subparagraph (a) is not sufficient to make a determination; or
 - (c) the customs authority of the exporting Party to access information, which may include the customs authority of the exporting Party undertaking a visit to the premises of the producer or exporter of the good to review relevant information and the production process where the information obtained under subparagraphs (a) and (b) is not sufficient to make a determination.
- 4. If the customs authority of the importing Party decides to conduct a verification, it shall accept written information directly from the importer, exporter, or producer.
- 5. Where a claim for preferential treatment is based on importer's knowledge that the good is originating, the customs authority of the importing Party shall only request the information on which the importer based their knowledge that the good was originating.
- 6. Where a claim for preferential treatment is based on a declaration of origin completed by the producer or exporter, the customs authority of the importing Party requesting information pursuant to subparagraphs 3(a) or 3(b) from the importer, producer, or exporter of the good shall only request the following:
 - (a) where the origin criterion is based on:

 - (iv) a value method, the value of the final product as well as the value of all non-originating materials used in the production where the build-down method is used or the value of all originating materials used in the production where the build-up method is used, as well as information on how such values are determined; or
 - (v) a production process, a specific description of that process:

- (A) where the provisions of Article 3.9 (Tolerance) have been relied on based on weight, the net weight of the final product as well as the weight of the relevant non-originating materials used in the final product, which have not undergone the applicable change in tariff classification; or
- (B) information relating to the compliance with the provisions on non-alteration referred to in Article 3.10 (Non-Alteration).

If, as a result of the verification, the importing Party determines that the good is an originating good, it shall grant preferential treatment to the good and refund any excess duties paid or release any guarantee provided, unless the guarantee also covers other obligations which have not been discharged. If, as a result of the verification, the importing Party determines that the good is not an originating good, it may deny preferential treatment to the good.
14. If, pursuant to a verification under this Article, the customs authority of the importing Party has not received sufficient information to determine that a good qualifies as originating, or that the importer, exporter, or producer has otherwise failed to comply with a requirement of this Chapter, it may deny preferential treatment to the good.

Article 3.27
Confidentiality

The provisions contained in Article 4.21 (Confidentiality – Customs Procedures and Trade Facilitation) also apply to this Chapter.

Article 3.28
Documentation Issued in a Non-Party

The customs authority of the importing Party shall not reject a claim for preferential tariff treatment for the sole reason that any supporting documents which are required pursuant to paragraph 4 of Article 3.19 (Origin Declaration) were issued in a non-party.

Article 3.29
Transitional Provisions for Goods in Transit

A Party shall grant preferential tariff treatment to an originating good, if on the date of entry into force of this Agreement, the good:

- (a) was being transported to that Party in accordance with Article 3.10 (Non-Alteration); or
- (b) had not been imported into that Party,

and if a valid claim under Article 3.18 (Claims for Preferential Tariff Treatment) for preferential tariff treatment is made within 180 days of the date of entry into force of this Agreement for that Party.

27		MINERAL FUELS, MINERAL OILS AND PRODUCTS OF THEIR DISTILLATION; BITUMINOUS SUBSTANCES; MINERAL WAXES Notwithstanding the applicable product-specific rules of origin, a good of chapters 27 through 40 that is the product of any of the following processes is an originating good if the process occurs in the territory of one or both of the Parties: Biotechnological Processing Rule “Biotechnological processing” means one or more of the following biotechnological processes: (a) biological or biotechnological culturing, hybridization or genetic modification of: (i) micro-organisms (including bacteria and viruses (including phages); or (ii) human, animal or plant cells; (b) the production, isolation or purification of cellular or intercellular structures (such as	

		isolated genes, gene fragments and plasmids); or (c) fermentation. Change in Particle Size Rule “Change in particle size” means the deliberate and controlled modification in particle size of a good, including micronizing by dissolving a polymer and subsequent precipitation, other than by merely crushing or pressing, resulting in a good with a defined particle size, defined particle size distribution or defined surface area, which is relevant to the purposes of the resulting good and having different physical or chemical characteristics from the input materials. Chemical Reaction Rule “Chemical reaction” means a process (including a biochemical process) that results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. A chemical reaction may be expressed by a change of the "CAS number". The following processes are not chemical reactions for purposes of origin: (a) dissolving in water or other solvents; (b) the elimination of solvents including solvent water; or (c) the addition or elimination of water of crystallization. This definition comprises all types of polymerization reactions. Distillation Rule

		Notwithstanding the applicable product-specific rules of origin, a good of chapter 27 that undergoes atmospheric or vacuum distillation in the territory of one or more of the Parties is an originating good. For the purposes of this rule: (a) atmospheric distillation means a separation process in which petroleum oils are converted, in a distillation tower, into fractions according to boiling point and the vapour then condensed into different liquefied fractions. Goods produced from petroleum distillation may include liquefied petroleum gas, naphtha, gasoline, kerosene, diesel/heating oil, light gas oils and lubricating oil; and (b) vacuum distillation means distillation at a pressure below atmospheric but not so low that it would be classed as molecular distillation. Vacuum distillation is used for distilling high-boiling and heat-sensitive materials, such as heavy distillates in petroleum oils to produce light to heavy vacuum gas oils and residuum. In some refineries, gas oils may be further processed into lubricating oils. Isomer Separation Rule “Isomer separation” means the isolation or separation of isomers from a mixture of isomers. Mixing and Blending Rule “Mixing and blending” means the deliberate and proportionally controlled mixing and blending (including dispersing) of materials, other than the addition of diluents, to conform to predetermined specifications, which results in the production of a good having physical or chemical characteristics which are relevant

		to the purposes or uses of the good and are different from the input materials. Production of Standard Materials Rule For the purposes of this rule, a “standard material” (including a standard solution) is a preparation suitable for analytical, calibrating or referencing uses having precise degrees of purity or proportions which are certified by the manufacturer. Purification Rule “Purification” means purification which results in one of the following criteria being satisfied: (a) purification of a material or product resulting in the elimination of at least 80% of the content of existing impurities; or (b) the reduction or elimination of impurities resulting in a product suitable for one or more of the following applications: (i) pharmaceutical, medicinal, cosmetic, veterinary, or food grade substances; (ii) chemical products and reagents for analytical, diagnostic or laboratory uses; (iii) elements and components for use in micro-electronics; (iv) specialised optical uses; (v) biotechnical use (e.g., in cell culturing, in genetic technology, or as a catalyst); (vi) carriers used in a separation process; or

40	40	RUBBER AND ARTICLES THEREOF Notwithstanding the applicable product-specific rules of origin, a good of chapters 27 through 40 that is the product of any of the following processes is an originating good if the process occurs in the territory of one or both of the Parties: Biotechnological Processing Rule	

		“Biotechnological processing” means one or more of the following biotechnological processes: (a) biological or biotechnological culturing, hybridization or genetic modification of: (i) micro-organisms (including bacteria and viruses (including phages); or (ii) human, animal or plant cells; (b) the production, isolation or purification of cellular or intercellular structures (such as isolated genes, gene fragments and plasmids); or (c) fermentation. Change in Particle Size Rule “Change in particle size” means the deliberate and controlled modification in particle size of a good, including micronizing by dissolving a polymer and subsequent precipitation, other than by merely crushing or pressing, resulting in a good with a defined particle size, defined particle size distribution or defined surface area, which is relevant to the purposes of the resulting good and having different physical or chemical characteristics from the input materials. Chemical Reaction Rule “Chemical reaction” means a process (including a biochemical process) that results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. A chemical reaction may be expressed by a change of the "CAS number".	
--	--	--	--

		The following processes are not chemical reactions for purposes of origin: (a) dissolving in water or other solvents; (b) the elimination of solvents including solvent water; or (c) the addition or elimination of water of crystallization. This definition comprises all types of polymerization reactions. Distillation Rule Notwithstanding the applicable product-specific rules of origin, a good of chapter 27 that undergoes atmospheric or vacuum distillation in the territory of one or more of the Parties is an originating good. For the purposes of this rule: (a) Atmospheric distillation means a separation process in which petroleum oils are converted, in a distillation tower, into fractions according to boiling point and the vapour then condensed into different liquefied fractions. Goods produced from petroleum distillation may include liquefied petroleum gas, naphtha, gasoline, kerosene, diesel/heating oil, light gas oils and lubricating oil; and (b) Vacuum distillation means distillation at a pressure below atmospheric but not so low that it would be classed as molecular distillation. Vacuum distillation is used for distilling high-boiling and heat-sensitive materials such as heavy distillates in petroleum oils to produce light to heavy vacuum gas oils and residuum. In some	
--	--	--	--

		refineries, gas oils may be further processed into lubricating oils. Isomer Separation Rule “Isomer separation” means the isolation or separation of isomers from a mixture of isomers. Mixing and Blending Rule “Mixing and blending” means the deliberate and proportionally controlled mixing and blending (including dispersing) of materials, other than the addition of diluents, to conform to predetermined specifications, which results in the production of a good having physical or chemical characteristics which are relevant to the purposes or uses of the good and are different from the input materials. Production of Standard Materials Rule For the purposes of this rule, a “standard material” (including a standard solution) is a preparation suitable for analytical, calibrating or referencing uses having precise degrees of purity or proportions which are certified by the manufacturer Purification Rule “Purification” means purification which results in one of the following criteria being satisfied: (a) purification of a material or product resulting in the elimination of at least 80% of the content of existing impurities; or (b) the reduction or elimination of impurities resulting in a product suitable for one or more of the following applications: (i) pharmaceutical, medicinal, cosmetic, veterinary, or food grade substances;	
--	--	---	--

		(ii) chemical products and reagents for analytical, diagnostic or laboratory uses; (iii) elements and components for use in micro-electronics; (iv) specialised optical uses; (v) biotechnical use (e.g., in cell culturing, in genetic technology, or as a catalyst); (vi) carriers used in a separation process; or (vii) nuclear grade uses.
