

Annex 3-A: Product Specific Rules

Section A – General Interpretative Notes

1. For the purposes of interpreting the rules of origin set out in this Annex:

- (a) the specific rule, or specific set of rules, that applies to a particular heading, subheading, or group of headings or subheadings is set out immediately adjacent to that heading, subheading, or group of headings or subheadings;
- (b) a requirement of a change in tariff classification or any other condition set out in a specific rule applies only to non-originating materials;
- (c) reference to weight in the rules for goods provided for in Chapters 1 through 24 of the Harmonized System means dry weight unless otherwise specified in the Harmonized System;
- (d) the expression “a change from any other heading” or “a change from any other subheading” means a change from any other heading (or subheading) of the Harmonized System, including, where applicable, any other heading (or subheading) within the group of headings (or subheadings) to which the rule is applicable;
- (e) the expression “a change from any heading outside that group” or “a change from any subheading outside that group” means a change from any other heading (or subheading) of the Harmonized System, except from any other heading (or subheading) within the group of headings (or subheadings) to which the rule is applicable;
- (f) the expression:
 - “a change from within that heading”;
 - “a change from within that subheading”;
 - “a change from within any one of these headings”;
 - “a change from within any one of these subheadings”;
 - “a change to (a good) of (a tariff provision) from within that (tariff provision)”;
 - “a change to (a good) of any one of (tariff provisions) from within that (tariff provision)”;

means a change from any other good or material of that same heading (or subheading) of the Harmonized System;

- (g) where two or more rules are applicable to a heading, subheading, or group of headings or subheadings and the alternative rule contains a phrase commencing with the words “whether or not”:
 - (i) the change in tariff classification specified in the phrase commencing with the words “whether or not” reflects the change specified in the first rule applicable to the heading, subheading, or group of headings or subheadings;

- (ii) the only change in tariff classification permitted by the alternative rule, in addition to the change in tariff classification specified at the beginning of that rule, is the change specified in the phrase commencing with the words “whether or not”;
- (iii) unless otherwise specified, only the value of the non-originating materials referred to at the beginning of the alternative rule, and specified again in the phrase commencing with the words “provided that the value of the non-originating materials”, shall be included in calculating the value of non-originating materials; and
- (iv) the value of any non-originating materials satisfying the change of tariff classification specified in the phrase commencing with the words “whether or not” shall not be included in calculating the value of non-originating materials; and
- (h) the following definitions apply:

chapter means a chapter of the Harmonized System;

heading means any four-digit number, or the first four digits of any number, used in the nomenclature of the Harmonized System;

section means a section of the Harmonized System; and

subheading means any six-digit number, or the first six digits of any number, used in the nomenclature of the Harmonized System.

2. A product specific rule of origin set out in this Annex represents the minimum amount of production required to be carried out on non-originating materials for the resulting good to achieve originating status. A greater amount of production than that required by the rule for that good will also confer originating status.

3. Where a rule of this Annex applicable to a good contains both a required change in tariff classification and a percentage for the maximum value of non-originating materials, the de minimis provision of Article 3.8 permits the use of non-originating materials which do not satisfy the tariff change requirement, as long as the value of such materials does not exceed 10 percent of the transaction value or ex-works price of the good. However, the value of such non-originating materials shall be included when calculating the value of non-originating materials and under no circumstances may the percentage for the maximum value of non-originating materials as set out in the rule be exceeded through the use of the de minimis provision.

4. Where a rule of this Annex applicable to a good contains both a required change in tariff classification and a percentage for the maximum value of non-originating materials, and one or more of the non-originating materials used in the production of the good are classified in the same subheading or heading that is not further subdivided into subheadings, as the good itself, Article 3.3.2 may be used. Article 3.3.2 provides that, in such instances, the good shall be considered as originating, if the value of the non-originating materials classified as or with the good does not exceed 55 percent of the transaction value or ex-works price of the good. Given that the resulting good qualifies as originating in its own right, no account shall be taken of the non-originating materials contained therein when that good is used in the production of another good. In this particular instance, only the value of any other

non-originating materials that are used in the production of the final good and that satisfy the required change in tariff classification set out in the rule of this Annex would need to be taken into account when calculating the value of non-originating materials for purposes of determining the origin of the final good.

5. The product specific rules set out in this Annex also apply to used goods.

Note 1: For the purposes of headings 27.07 and 27.10, a “chemical reaction” is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds or by altering the spatial arrangement of atoms in a molecule.

The following are not considered to be chemical reactions for the purposes of this definition:

- (a) dissolving in water or other solvents;
- (b) the eliminating of solvents including solvent water; or
- (c) the addition or elimination of water of crystallization.

Note 2: For the purposes of heading 27.10, either of the following processes confers origin:

- (a) Atmospheric distillation – A separation process in which petroleum oils are converted, in a distillation tower, into fractions according to boiling point and the vapour then condensed into different liquefied fractions; or
- (b) Vacuum distillation – Distillation at a pressure below atmospheric but not so low that it would be classed as molecular distillation.

Note 3: For purposes of heading 27.10, “direct blending” is defined as a refinery process whereby various petroleum streams from processing units and petroleum components from holding/storage tanks combine to create a finished product, with pre-determined parameters, classified under heading 27.10, provided that the non-originating material constitutes no more than 25 percent by volume of the good.
